

Poison Ivy Eye Mask (Tracing Guide)

1

The first image in this three image set is the eye mask base. Cut out this shape along the black line. Then use this template as a tracing guide on the foam sheet.

These are the three detailing leaves. The grayed out area is to be used as a reference for leaf placement. Once these three pieces are cut out you should have four objects in total. That includes the base.

2

3

The final image to the left is how the assembled mask should appear. (After gluing of course!) To complete the other half of this mask just flip over the tracing guides and repeat the process.
